

NICHE LIGHT TROUBLE SHOOTING MANUAL

FAQ & TROUBLE SHOOTING GUIDE

WHAT IS LED LIGHTING?

LED lighting is a new lighting technology which uses much less energy and lasts much longer than traditional light sources. Additional benefits are lower heat output, zero infra red radiation, ease of installation and many more.

CAN I INSTALL YOUR PRODUCTS MYSELF?

Sunline LED pool lights are easy to install and in many cases operate on safe low-voltages, however we always recommend that any lighting or electrical installation be carried out by a suitable licensed electrician

MY LIGHTS AREN'T SYNCING?

This only applies if there are 2 more lights in the pool. To reset the unit power to the lights needs to be turned off and on for 3 seconds

IT'S COMPLETELY DEAD!

- Check if power is on
- Check fuse box
- Check that all relevant cables are connected
- If all above is correct and the unit is still not working - Contact Sunline

THE FRONT FACE KEEPS FALLING OFF

Twist and turn the cover plate in place, if it still falls off The connecting lugs may be broken - if so replacement ones are available - Contact Sunline

THE COLOURS AREN'T CONSISTENT

When installing more than 1 x Pool light, colour may vary from Light to Light, mainly caused from refraction.

THE LENSE IS FULL OF WATER

For whatever reason, water has breached the sealed unit. Contact Sunline for a replacement. If your light is in within warranty make sure you have your proof of purchase.

HOW LONG DO THEY LAST?

Long life – LED life span of over 70,000 hours

CHANGING THE COLOUR MODE

With the light power on, the light must be switched off and back on within 2 seconds, the light will then change to the next colour mode. When it changes to the last colour mode, it will come back to Mode 1.

CHANGING TWO OR MORE LED LIGHTS COLOUR MODES TO THE SAME MODE

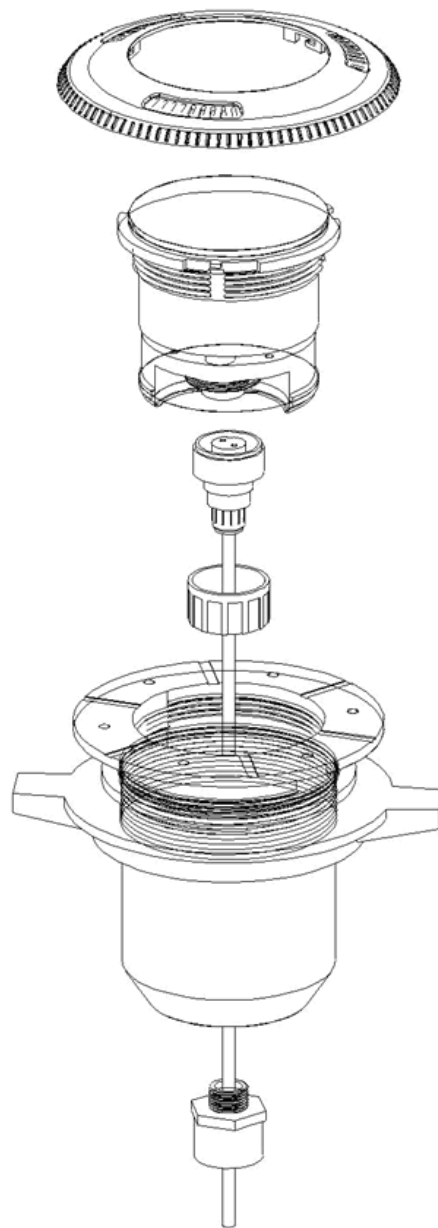

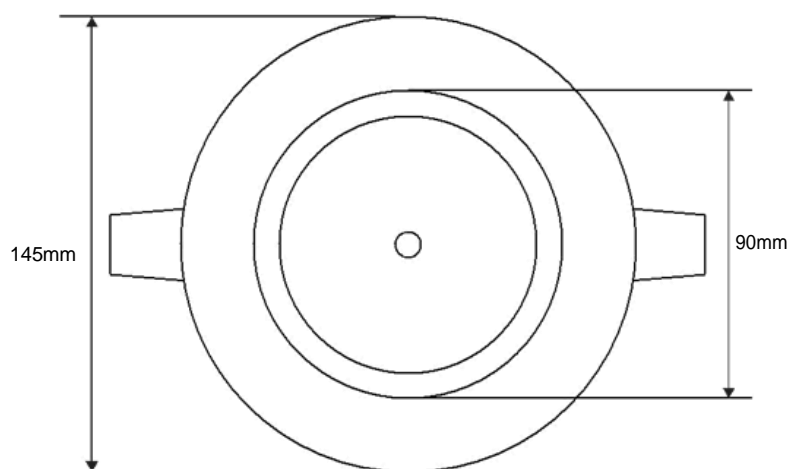

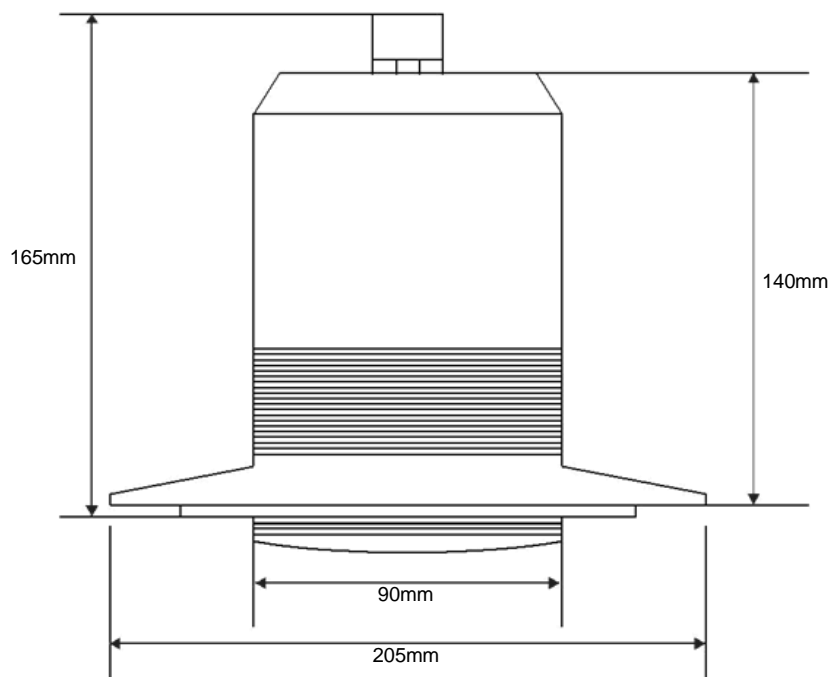

No matter what colour mode the LED lights are on, by switching ON and OFF three times (within 3 seconds), all of the LED lights will be changed to Mode 1.

LED lamps are pre-programmed with 7 lighting modes. The 7 modes are as follows:

- a) Green
- b) Green/Red
- c) Blue/Green/Red
- d) Multiple fading in and out 5. Rotating colours
- e) Blue
- f) Blue/Red
- g) Blue/Green
